

Purpose of Adult RailCamp

The RailCamp for Adults is a series of experiences to acquaint adults with modern museum operations, interpretation of historic artifacts, and operation of historic equipment. Many adults have the interest and time to serve as volunteers or employees at museums and this experience provides some basic information about those operations. The National Railway Historical Society and the Nevada Northern Railway Museum combined to provide this experience. Adult RailCamp involves actual work with restored historic rail equipment displays or equipment operated as a part of the museum program. Participants have the chance to experience the maintenance of steam and diesel locomotives. The NNRM is located in Ely, NV on the site of the Nevada Northern Railway, a copper-hauling line. The Railway operated from 1905 until 1983 and exists today largely as it did when it shutdown.

Students will experience:

- Train dispatching
- Museum Railroad Operations
- Steam and Diesel Locomotive Operations
- Steam and Diesel Locomotive Repair and Restoration
- Interpretation of Railroad History (learning how to tell the story of railroad history)
- Non-profit museum operations
